Profile

Emerging software engineer skilled in the **MERN stack, Next.js, TypeScript, Prisma, and PostgreSQL**. Focused on building scalable applications, secure authentication flows, and optimized database systems through clean architecture and modern engineering practices.

Skills

Languages & Frameworks

JavaScript | TypeScript | SQL | React.js | Next.js | Node.js | Express.js | Tailwind CSS

Databases & ORM

MongoDB | Mongoose | PostgreSQL | Prisma ORM | Data Modeling | Query Optimization

Backend, APIs & Tools

REST APIs | JWT | SSR | CRUD | SSL | Stripe | Git | GitHub | VS Code | Postman | Debugging | Clean Code | Agile | Deployment | Scalable Apps

Projects

ePay Wallet – Digital Wallet Platform (MERN Stack) Live 🔗 | Client Repo 🔗 | Server Repo 🔗

- Built a secure digital wallet system for **adding funds, sending money & tracking transactions**.
- Implemented **JWT auth with HttpOnly cookies**, role-based access (**User/Agent/Admin**) & session security.
- Designed wallet logic with **atomic balance update, transaction logs & rollback safety**.
- Admin dashboard to manage users, verify identity requests & monitor suspicious transfers.
- Followed **MVC architecture**, field validation & centralized error handling for scalable backend.

Tech: React, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, RTK Query
