Shahariar Sohan

Full Stack Developer

sohanshahariar4@gmail.com | **+8801622143630** | LinkedIn | Github | Portfolio | Chattagram, Bangladesh

PROFILE

Full Stack Developer with **8 months of professional experience** building frontend applications, backend services, APIs, and database-driven systems. Skilled in **JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL**. Experienced in solving technical problems, explaining technical solutions, and communicating with clients and teammates throughout project development.

SKILLS

Languages & Frameworks
JavaScript (ES6+), TypeScript, SQL, React.js, Next.js, Redux Toolkit, Node.js, Express.js.

Backend & Database Engineering
PostgreSQL, MongoDB, Prisma ORM, Mongoose, Relational Data Modeling, Indexing, Query Optimization.

Architecture & APIs
RESTful API Design, JWT Authentication, Middleware Development, System Design Patterns.

Development & Deployment: Git/GitHub, Postman, Linux VPS, Docker, Nginx, PM2, application deployment and troubleshooting.

Engineering Practices
Test-Driven Development concepts, Clean Code, Agile, Debugging & Performance

EXPERIENCE

SM Technology | Full Stack Web Developer (February 2026 - Present)

Develop frontend and backend features using React.js, Next.js, Node.js and Express.js. Manage APIs, databases, authentication, and application integrations.

Contribute as a backend developer to DailyMiles and EzyDash, live Android and iOS apps.

Deploy and troubleshoot production applications using Linux VPS, Docker, Nginx, and PM2.

Communicate with clients and teammates to clarify requirements, explain solutions, and coordinate delivery.

PROJECTS

EzyDash | Campus Marketplace & Community Platform
A hyperlocal campus marketplace and community platform for African tertiary institutions, designed for events, accommodation, services, and more.
Contribution: Developed backend APIs and supported event booking, data management, and application integrations.
Links: App Store | Play Store | Landing Page

Daily Miles | Health & Rewards App
A fitness app that encourages walking, rewards physical activity, and connects users with healthy food shops offering discounts.
Contribution: Developed backend functionality for activity tracking, reward points, and application integrations.
Links: App Store | Play Store | Landing Page

HDRT | Hidden Dependency Risk Tracker
Built a risk-analysis platform using Next.js, Node.js, Express.js, PostgreSQL, and Prisma to identify organizational dependency risks.
Link: Web application

ACHIEVEMENTS

Next Level Web Development Certified

EDUCATION & LANGUAGES

SSC completed | HSC completed | Bangla (Native), English (Professional), Hindi (Fluent)
